Greetings from **NAGARJUNA AGRO CHEMICALS PVT LTD!!**

We appreciate your patronize for being our esteemed customer by owning the Mridaparikshak – Minilab (Model – 1) developed by ICAR – Indian Institute of Soil Science (IISS), Bhopal. In this connection, we invite your kind attention to reference cited, wherein we have supplied this model to KVK's covered under your ATARI ZONE, fabricated with inscribing software to analyze and provide fertilizer recommendations for 10 parameters viz., pH, EC, Organic Carbon, Available Nitrogen, Phosphorous, Potassium, Sulphur, Zinc, Iron and Boron.

Subsequently, on demand from several quarters, we thought it is appropriate to upgrade this model by including 5 more parameters such as **Manganese, Copper, Gypsum requirement, Lime requirement and Calcareousness** which are of crucial importance from the point of view of their significant role in crop production and soil health, though it costed us some extra money.
